WALL TO WALL

STRAIGHT RUN

- A. Measure locker area between walls. Determine that correct # of lockers will fit.
- B. Start install with the lockers on the right.
- C. If space remaining after lockers installed, use fillers to fill space. Install the fillers to left of lockers (if applicable).
- D. Install top fillers last. Install a support on the wall and rest top filler on support and top of locker.
- E. Tighten all nuts and bolts.
- F. Adjust doors.

L SHAPE OPEN END

- A. Measure locker area.
- B. Start with the lockers from the back wall right side (if layout is the reverse from shown, start from the left side).
- C. Install fillers to left of lockers (if applicable).
- D. Install some type of blocking on both walls in the corner for top corner fillers to rest on.
- E. Install side wall lockers.
- F. Install top fillers last.
- G. Tighten all nuts and bolts.
- H. Adjust doors.
